## Care Dental Focus News

**New web site** is launched for our referring dentists!  
Visit [www.care-dental.co.uk](http://www.care-dental.co.uk) and email your Implant, Perio and Endo referrals!

**New course for 2011/2012.** Come and join us on this years post - graduate mentoring programme.

In return for referrals we provide, as a compliment, a post graduate education and mentoring programme to support the development of our referring dentists – whether restorative or surgical. We have also developed a training programme to help our referring practices to attain the skills and presentation techniques, which we have found necessary to achieve maximum patient acceptance. New for this course is our business study club which will address business issues chosen by our participants.

All of the above is complimentary to dentists referring five patients a year. The events run by visiting lecturers will be charged at cost. See the back page for a summary of the whole programme for 2011-12. Some of the events are evenings and others full days. The first six events are highlighted within this newsletter. Email Angela on [referrals@care-dental.co.uk](mailto:referrals@care-dental.co.uk) to book onto the individuals sessions. Spaces are limited so **DO IT NOW.**

The programme this year kicks off with **Dr Paul Tipton.**

## Programme 2011/2012

### Session 1 (Full Day) - 7 hrs CPD

**Part 1** Tooth preparation for advanced restorative dentistry  
**Part 2** Smile design  
**Lecturer** Dr Paul Tipton  
**Date** Saturday 7th May 2011  
**Venue** Care Dental, Crieff

Do you know how well you are preparing teeth? Are you confident in the varying preparations required for the full range of materials that the laboratories use? Dr Paul Tipton needs little introduction and is an expert in this field. In an interactive session he will provide us with a complete overview on the best of techniques required for the range of restorative options we have. Building on the basis of correct tooth preparation the afternoon session will focus on smile design and cosmetic dentistry. How do we create the perfect smile? That is Dr Tipton's question.

**There will be a course fee of £60 per dentist.**

### Session 2 (Evening) - 2 hrs CPD Treatment Planning

**Lecturer** Dr Bruce Strickland  
**Date** Tuesday 7th June 2011  
**Venue** Care Dental, Crieff  
**Buffet** 6.30pm - 7.00pm start

One of the keys to success within advanced restorative practice is to excel within Treatment Planning. Understanding what is possible is important but equally important is how to develop these options with our patients so as to achieve maximum patient acceptance. This is not "sales pitch dentistry" and nothing is "sold" however I have developed a system of treatment planning that is reproducible for all general practitioners. It's about understanding our patients' expectations, exploring their barriers to trust and knowing how to communicate complicated and expensive treatment options.

### Periodontology - 3 hrs CPD Perio and Pamper

**Lecturer** Dr Alan Maxwell  
**Date** Saturday 11th June 2011  
9.30am to 12.30pm  
**Venue** Care Dental, Crieff

Following on from our successful Saturday morning study group we are going to run the Hygienist Support Study Group as 2 Perio and Pamper sessions; a 3 hour study session and a day pass to Crieff Hydro's Spa.

Each dentist looks after 1,000+ patients and statistically at least 20% of them have periodontitis.

What is our responsibility to these patients? How should we monitor them and what is the best way of structuring their long-term care?

These sessions are equally appropriate for hygienists and dentists.

### Session 3 (Full Day) - 7 hrs CPD Foundation Course in Implantology

**Lecturers** Dr Bruce Strickland & Straumann Team  
**Date** Saturday 27th August 2011  
**Venue** Care Dental, Crieff

This full day course, run in conjunction with Straumann, is intended for those with limited experience in implant dentistry or for those who would like to refresh their knowledge. This practical hands-on day enables the dental surgeon to become involved with the restorative process of Implantology and to have a wider understanding of Implantology in general.

### Business Club (Eve)

**Topic to be confirmed by participants of the 'Issues in business' questionnaires.**

**Lecturer** Christa Strickland MBA Pg Dip MCIPD  
**Date** Tuesday 6th September  
**Venue** Care Dental, Crieff

### Session 4 (Full Day) - 7 hrs CPD Prosthetics - Making Perfect Dentures

**Lecturer** Dr Charlotte Stillwell  
**Date** Saturday 1st October 2011  
**Venue** Care Dental, Crieff

Dr Stillwell is a Specialist Prosthodontist working in Harley Street and is the Head of Education for ITI (The International Team for Implantology). She is a recognised expert in the field of creating perfect dentures and is an exceptionally good communicator and educator. This full day will cover how to get the best results in the art of making partial and full dentures. Charlotte will finish up with an overview of how to get the best out of implant retained overdentures. We will invite all our technicians to come along.
